

Herbicide Compensation Guidelines
50/50 Cost Share of Landowner and NLCHPP
For Herbicide Purchased through LCWD

1. Total Project funding allocation is \$4990
2. Cost share is 50% landowner & 50% NLCHPP with a cap per landowner/family/entity based upon acreage owned.
Cost Share breakdown by acreage is as follows:
 - **35 – 160 acres owned = \$50 cap** (Applicant \$50 - NLCHPP \$50 for \$100 of product.)
 - **160 – 400 acres owned = \$100 cap** (Applicant \$100 – NLCHPP \$100 for \$200 of product.)
 - **400 – 1000 acres owned = \$150 cap** (Applicant \$150 – NLCHPP \$150 for \$300 of product.)
 - **1000 + acres owned = \$200 cap** (Applicant \$200 – NLCHPP \$200 for \$400 of product.)
3. LCWD is the only herbicide vendor collaborating in this cost share project.
4. LCWD will discount the herbicide at approximately 20% or greater, depending on grant monies available.
5. Landowners must complete an application request, detailing the number of acres of infestation, amount of product requested and types of weeds targeted. (See Herbicide Cost Share Application)
6. Noxious weeds targeted are limited to those on the LCWD list of targeted noxious weeds.
7. We require that the LCWD herbicide recommendations be utilized for this project.
8. The LCWD will provide site visits to help landowners with weed species identification, management recommendations and follow-up visits if requested.
9. LCWD will provide management reference guides, sprayer loans, storage, and distribution of herbicides.
10. Qualifying landowners (owning 35+ acres) will be mailed a voucher to be turned into the LCWD when the product is picked up. This voucher will be good for up to a specific dollar amount, (not to exceed the allowable dollar cap based on acreage owned), and that the landowner would match funding. Landowners will pay their 50% (plus any applicable taxes) at the time of herbicide pickup. NLCHPP will be billed the remaining amount by the LCWD. Please call approximately 5 days prior to pick up so the LCWD can have product on hand and personnel available to assist you.
11. Funding is for the product only. Landowners are responsible for their own application of the herbicide.
12. So that we might determine the success of this weed control project, survey forms will be given to each applicant with his or her product voucher. Please return completed surveys to NLCHPP.
